PROGRAMMING IN C LANGUAGE FOR BEGINNERS

(A value-added course organised by Department of Mathematics & IQAC)
Course Code : GGDCMATH-01 VAC ::::Academic Session : 2023-2024

Programme Outcome

After completion this course the participants will be able to acquire such kind of skills or abilities:

- Basic knowledge of software and hardware of computers
- Develop a C program
- Illustrate the flowchart and design an algorithm for a given problem and to develop C programs using operators
- Develop conditional and iterative statements to write C programs
- Develop conditional and iterative statements to write C programs
- Control the sequence of the program and give logical outputs
- Implement strings in your C program
- Store different data types in the same memory
- Manage I/O operations in your C program
- Repeat the sequence of instructions and points for a memory location
- Understand the basics of file handling mechanisms
- Exercise user defined functions to solve real time problems

Syllabus of the course

Unit-1: Components of a Computer : Hardware and Software
Unit-2: Introduction to Computing : Algorithms and Flowcharts
Unit-3: Overview of C, Constants, Variables and Data Types
Unit-4: Operations and Expressions, Managing Input and Output Operations
Unit-5: Decision Making (Branching and Looping)
Unit-6: Array of real numbers and character
Unit-7: String

Medium of instruction : Bengali and English
Duration of course : 38.5 hours (Lecture and Practical: 35.5 contact hours, :12 hours, Evaluation : 3 hours)
Evaluation : MCQ(60 marks), Practical Exam(30 marks), Attendance (10 marks)

Unit12: Cyber Ethics and Cyber Crime.

Objective of the course

1. A basic computer application course aims to provide fundamental computer knowledge and programming/algorithm skills..
2. Its goal is to acquaint students with the basic ideas and theories of computing so they may comprehend how computers function, how software is created, and how to design basic programs.
3. It also aids in the development of analytical and critical thinking abilities in pupils, which are essential for using computers to solve problems in the real world.

Outcome of the course

1. The learning objectives of a foundational computer application course usually involve comprehension of core concepts, principles, and computational reasoning.

2. Students also usually gain proficiency in problem-solving skills and the ability to analyze and design simple algorithms and programs.
